**Hatching the Past
at the
Danville Science Center**

DANVILLE — Dig for dinosaur eggs like a real paleontologist. Touch a real dinosaur leg bone fossil. Examine a model dinosaur nest. Ever wonder what dinosaur families were like? Did little dinosaurs ever meet their parents? Find out what scientists are uncovering in the visiting exhibition Hatching the Past at the Danville Science Center Saturday, Jan. 23-Monday, Sept. 6.

“This is a great opportunity to find out more about how dinosaurs lived — and how scientists make those discoveries,” says Danville Science Center Director Jeff Liverman
